PCT

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (Chapter I of the Patent Cooperation Treaty)

(PCT Rule 44bis)

Applicant's or agent's file reference PC1197PC00	FOR FURTHER ACTION	See item 4 below
International application No. PCT/EP2004/007052	International filing date (<i>day/month/year</i>) 29 June 2004 (29.06.2004)	Priority date (<i>day/month/year</i>) 04 July 2003 (04.07.2003)
International Patent Classification (8th edition unless older edition indicated) See relevant information in Form PCT/ISA/237		
Applicant EPIGENOMICS AG		

1.	This international preliminary report on patentability (Chapter I) is issued by the International Bureau on behalf of the International Searching Authority under Rule 44 bis.1(a).																								
2.	<p>This REPORT consists of a total of 7 sheets, including this cover sheet.</p> <p>In the attached sheets, any reference to the written opinion of the International Searching Authority should be read as a reference to the international preliminary report on patentability (Chapter I) instead.</p>																								
3.	<p>This report contains indications relating to the following items:</p> <table style="width: 100%; border: none;"> <tr> <td style="width: 15%; text-align: center;"><input checked="" type="checkbox"/></td> <td style="width: 35%;">Box No. I</td> <td style="width: 50%;">Basis of the report</td> </tr> <tr> <td style="text-align: center;"><input checked="" type="checkbox"/></td> <td>Box No. II</td> <td>Priority</td> </tr> <tr> <td style="text-align: center;"><input type="checkbox"/></td> <td>Box No. III</td> <td>Non-establishment of opinion with regard to novelty, inventive step and industrial applicability</td> </tr> <tr> <td style="text-align: center;"><input type="checkbox"/></td> <td>Box No. IV</td> <td>Lack of unity of invention</td> </tr> <tr> <td style="text-align: center;"><input checked="" type="checkbox"/></td> <td>Box No. V</td> <td>Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement</td> </tr> <tr> <td style="text-align: center;"><input type="checkbox"/></td> <td>Box No. VI</td> <td>Certain documents cited</td> </tr> <tr> <td style="text-align: center;"><input checked="" type="checkbox"/></td> <td>Box No. VII</td> <td>Certain defects in the international application</td> </tr> <tr> <td style="text-align: center;"><input type="checkbox"/></td> <td>Box No. VIII</td> <td>Certain observations on the international application</td> </tr> </table>	<input checked="" type="checkbox"/>	Box No. I	Basis of the report	<input checked="" type="checkbox"/>	Box No. II	Priority	<input type="checkbox"/>	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability	<input type="checkbox"/>	Box No. IV	Lack of unity of invention	<input checked="" type="checkbox"/>	Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement	<input type="checkbox"/>	Box No. VI	Certain documents cited	<input checked="" type="checkbox"/>	Box No. VII	Certain defects in the international application	<input type="checkbox"/>	Box No. VIII	Certain observations on the international application
<input checked="" type="checkbox"/>	Box No. I	Basis of the report																							
<input checked="" type="checkbox"/>	Box No. II	Priority																							
<input type="checkbox"/>	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability																							
<input type="checkbox"/>	Box No. IV	Lack of unity of invention																							
<input checked="" type="checkbox"/>	Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement																							
<input type="checkbox"/>	Box No. VI	Certain documents cited																							
<input checked="" type="checkbox"/>	Box No. VII	Certain defects in the international application																							
<input type="checkbox"/>	Box No. VIII	Certain observations on the international application																							
4.	The International Bureau will communicate this report to designated Offices in accordance with Rules 44bis.3(c) and 93bis.1 but not, except where the applicant makes an express request under Article 23(2), before the expiration of 30 months from the priority date (Rule 44bis .2).																								

The International Bureau of WIPO 34, chemin des Colombettes 1211 Geneva 20, Switzerland	Date of issuance of this report 09 January 2006 (09.01.2006)

Applicant
EPIGENOMICS AG

1. This opinion contains Indications relating to the following items:

- ☒ Box No. I Basis of the opinion
- ☒ Box No. II Priority
- ☐ Box No. III Non-establishment of opinion with regard to novelty, Inventive step and Industrial applicability
- ☐ Box No. IV Lack of unity of invention
- ☒ Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, Inventive step or Industrial applicability; citations and explanations supporting such statement
- ☐ Box No. VI Certain documents cited
- ☒ Box No. VII Certain defects in the International application
- ☐ Box No. VIII Certain observations on the international application

2. FURTHER ACTION

If a demand for International preliminary examination is made, this opinion will usually be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA"). However, this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1b/s(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of three months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

3. For further details, see notes to Form PCT/ISA/220.

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.
PCT/EP2004/007052

Box No. I Basis of the opinion

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
☐ This opinion has been established on the basis of a translation from the original language into the following language , which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
 - a. type of material:
☒ a sequence listing
☐ table(s) related to the sequence listing
 - b. format of material:
☒ In written format
☒ In computer readable form
 - c. time of filing/furnishing:
☒ contained in the international application as filed.
☒ filed together with the international application in computer readable form.
☐ furnished subsequently to this Authority for the purposes of search.
3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
4. Additional comments:

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.
PCT/EP2004/007052

Box No. II Priority

1. ☐ The following document has not been furnished:

☐ copy of the earlier application whose priority has been claimed (Rule 43*bis*.1 and 66.7(a)).

☐ translation of the earlier application whose priority has been claimed (Rule 43*bis*.1 and 66.7(b)).

Consequently it has not been possible to consider the validity of the priority claim. This opinion has nevertheless been established on the assumption that the relevant date is the claimed priority date.

2. ☐ This opinion has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rules 43*bis*.1 and 64.1). Thus for the purposes of this opinion, the international filing date indicated above is considered to be the relevant date.

3. ☒ It has not been possible to consider the validity of the priority claim because a copy of the priority document was not available to the ISA at the time that the search was conducted (Rule 17.1). This opinion has nevertheless been established on the assumption that the relevant date is the claimed priority date.

4. Additional observations, if necessary:

Box No. V Reasoned statement under Rule 43*bis*.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes: Claims	
	No: Claims	1-11,26
Inventive step (IS)	Yes: Claims	
	No: Claims	1-30
Industrial applicability (IA)	Yes: Claims	1-30
	No: Claims	

2. Citations and explanations

see separate sheet

Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Basis for the assessment of novelty, inventive step and industrial applicability

1.1 Reference is made to the following document/s/:

- D1: PHAM PHUONG ET AL: "Processive AID-catalysed cytosine deamination on single-stranded DNA simulates somatic hypermutation." NATURE (LONDON), vol. 424, no. 6944, 3 July 2003 (2003-07-03), pages 103-107, XP002302398 ISSN: 0028-0836
- D2: BRANSTEITTER RONDA ET AL: "Activation-induced cytidine deaminase deaminates deoxycytidine on single-stranded DNA but requires the action of Rnase." PROCEEDINGS OF THE NATIONAL ACADEMY OF SCIENCES OF THE UNITED STATES OF AMERICA, vol. 100, no. 7, 1 April 2003 (2003-04-01), pages 4102-4107, XP002302399 ISSN: 0027-8424
- D3: EDITED BY S. BECK AND A.OLEK: "The Epigenome" 2003, WILEY-VCH VERLAG GMBH , WEINHEIM, GERMANY , XP008037599

2. Novelty

2.1 Document D1 discloses a method for detecting cytosine methylations in partially single stranded DNA by contacting the DNA to be investigated with an activation-induced cytidine deaminase (AID) converting cytidine into uracil but leaving methylated cytidine unchanged, investigating the deaminated nucleic acid and concluding therefrom on the methylation status of the DNA sequence. D1 shows that AID has a sequence preference for its activity. Thus, the DNA may only be partially be deaminated (D1, whole document). Claims 1-3, 26 lack novelty (Art 33(2) PCT). The same subject-matter is also disclosed in D2 (D2, whole document). Thus, claims 1-3, 26 lack also novelty over D2 (Art 33(2) PCT).

2.2 D2 further discloses that the DNA to be analysed hybridises with an oligomer

whereby a "DNA bubble" is formed resulting in that the nucleotide to be investigated localised in the single stranded part. The said single stranded part may be 1, 3, 4, 5 or 9 nucleotide in length whereby the oligonucleotide has a length of 27 nucleotides. The substrate is present at a concentration of 100nM (D2, Table 1; page 4106, right col.). Thus, also claims 4-11 lack novelty over D2 (Art 33(2) PCT).

3. Inventive step

- 3.1 Claim 30 differs from the subject-matter disclosed in D1 in that the reagents for deamination are provided in form of a kit.

The technical problem appears to be the provision of the assay reagents in a useful form.

It appears that an inventive step (Art 33(3) PCT) cannot be acknowledged for the solution provided in claim 30, namely the provision of a kit, as it represents a standard procedure for the skilled person to convert a successful laboratory method in to a kit which permits the less experienced to perform a technically demanding technique.

- 3.2 Claims 24, 25, 27 and 28 refer to the use of the method of claim 1 for, among others, diagnosis of cancer or differentiation of cells. D3 discloses the biological role of cytidine methylation in gene silencing, development, abnormal methylation in cancer cells, ageing etc. (D3, pages 7-15) and reviews methods of DNA methylation analysis. It would therefore appear that no inventive step can be acknowledged for the said claims referring to the obvious combination of a known method of cytidine methylation analysis (see D1 and D2, items 2.1 and 2.2 above) with the disclosure of D3 (Art 33(3) PCT).

- 3.3 Dependent claims 12-23 and 29 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of inventive step, as the said claims refer to features which fall into the conventional modifications introduced into a method of cytidine methylation detection (Art 33(3) PCT).

4. Industrial applicability

- 4.1 The subject-matter disclosed in the claims 1-30 of the present application appears to be industrially applicable (Art 33(4) PCT).

Re Item VII

Certain defects in the international application

1. The present application does not meet the requirements of Art 5 and Rule 5 PCT as documents D1-D3, which represent relevant prior art, are not referred to therein.
